

Gift Box Christmas Decoration Tempalte

Notes / Instructions:

- The box size is 6 × 6 cm (2.36" × 2.36").
- Print the template on regular paper and trace the parts onto cardstock. The bottom part is detached to save space on the cardstock.
- Cut the parts out of the cardstock. Connect the bottom part to the main part using the glue tab, where it's marked on the template.
- To assemble the box, score and fold along the dashed lines, then use the glue tabs to close up the shape.
- After assembling the box, glue strips of ribbon around the sides — one along the width and one along the height.
- Make a small bow from another piece of ribbon.
- Thread a string through the center loop of the ribbon, for hanging the box.
- Stitch the knot of the bow to secure it (**optional**), then glue the bow on top of the box.
